6 Seater Pram Risk Assessment

Activity	6 Seater Pram
Summary of activity. The 6-seater pram can be used for offsite evacuations & local walking excursions (if permission note is signed)	

Risk Name	Hazards	Risks	Risk Assessment	Control Measures	Who	When
Pram tipping over	Uneven surfaces Steep slopes Unbalanced pram Over loading pram Deterioration of pram quality	Injury to children & educators - Bruising - Abrasions - Muscle strain - Broken bones - Concussion - Head injury	Likelihood: Unlikely Consequences: Significant Risk Rating: Moderate	2 educators to move & support pram when in motion. - Consider children's size & weight when loading pram aiming for a balanced load. - Identify routes to minimise uneven surfaces, drop in levels, width of paths. - When leaving a path aim to use a mountable or semi-mountable kerb. - Educators driving the pram to have safety strap on at all times when brake is off.	- Room Leader - Person in Day to Day Charge - Nominated Supervisor	- When loading the pram. - Before taking the brake off to move. - Identify & walk routine before leaving the premises. - Check pram repair & maintenance needs monthly.

Children exiting the pram	Children falling out of pram. Children leaving the pram unsupervised.	• Bruising • Abrasions • Broken bones • Concussion • Head injury	Likelihood: Rare Consequences: Moderate Risk Rating: Low	• 2 educator supervising children in the pram. • Safety harnesses are in good working condition & adjusted to fit the size to the child. • The child has the muscle control & development to sit unsupported in the pram.	• All Educators	• When loading the pram. • Supervision when children are in the pram.
Environmental	Sun exposure Water hazards Animals & Insects Plants Weather conditions Temperature Extreme pollution	Sun burn Drowning Bites & Stings Allergic reactions Over heating or cooling Smoke inhalation	Likelihood: Unlikely Consequences: Moderate Risk Rating: Moderate	• Children to wear sun safe hats & clothing. • Be aware & avoid water hazard where possible. • Supervision of children & environment close to the pram. • Check children dressed for appropriate weather conditions. • Avoid excursion when UV is above 8 unless an emergency evacuation. • Park pram in shade when possible. • Have fluids to keep children hydrated. • Use & adjust sun hood to maximise shade for children in each row.	All educators	• Check weather conditions before leaving the service. • During excursion or evacuation. • Walk on routine that have been identified with no or minimal risks.

					Be aware of children personalities & social risk factors.			
Biological	Bodily fluids Mould Stinging insects Harmful plants Animals Medical – - Allergies - Anaphylaxis - Asthma - Chocking	Cross contamination of infectious virus & bacteria. Allergic reaction to moulds Bites or stings from flying or crawling insects Bites from animals Medical incident from a diagnosed or undiagnosed medical condition.	Likelihood: Unlikely Consequences: Moderate Risk Rating: Moderate	Ensure pram is stored in a clean, dry location. Clean pram after use with soapy water after use. Supervise children & the environment round them to minimise health & safety risks. Carry 1 st aid & asthma kit. Carry children person medical plan & medicine.	All educators	•Before & after use check & maintenance the cleanliness of the pram. •Good supervision practice while pram is in use. •Current knowledge of children's medical plans.		
Vehicles	Collision with a stationary vehicle. Collision with a moving vehicle.	Bruising Broken limbs Spinal injury Brain injury Loss of blood Death	Likelihood: Rare Consequences: Major Risk Rating: Moderate	2 educators controlling the pram at all times. Use footpaths where possible. Follow best practice road crossing rules.	All educators	•When using the pram outside the service.		

Review

The Management, employees, families and interested parties will monitor and review the effectiveness of this policy annually or more regularly if required.
